

AZ Sint-Maarten in Mechelen

VK Architekten und Ingenieure, Jansen Group

The Jansen Group is the proud winner of the Patient Room of the Year award. Jansen seeks its own paths in the construction sector, focussing on innovation and making every room a place to be for residents, employees, connoisseurs and, last but not least, patients.

The KAY comfort ceilings with a patented pipe system make every hospital stay as pleasant as possible. Patients enjoy a cosy room climate thanks to cooling and heating by convection and radiation (no draughts and noiseless), healthy ventilation and perfect acoustics. All functions are combined in a stylish, compact design in which even the lighting, music, fragrance, motion and daylight sensors can be integrated.

KAY is also fibre-free, dust-free and easy to clean. In this way, the Jansen Group is happy to contribute to the well-being and rapid recovery of patients.
