

## Lights of Vienna, Guntramsdorf

The global market leader for spectacular lighting objects, "Lights of Vienna", collaborates with top designers and architects to create unique, innovative lighting fixtures and lighting concepts.

These individually handcrafted luminaires are specially designed for clients worldwide — from luxury hotels to prestigious high-end properties. Everything from the initial design sketch to the finished product is handled entirely in-house.

The one-piece ceiling baffles for the presentation room in Guntramsdorf near Vienna were also custom-made by Fural. Here too, sophisticated modern design goes hand in hand with functionality. A baffle ceiling solution was considered optimal, not only due to the wide range of design possibilities it offers but also because of its high flexibility: the technical systems in the ceiling void are easily accessible, baffles provide excellent acoustic performance, and lighting elements can be installed both between and within the baffles.

### Project Data

*Perforation:*

Rd 15-20%

*Color:*

RAL 4201

*System:*

Baffel

*Metal ceiling area:*

178 meters

*Function:*

acoustics, design
