

## Rabobank Fellenoord Fase 2

### Inbo Amsterdam

With the redesign of the Rabobank office in Fellenoord, Eindhoven Netherlands, fantastic possibilities were created to guarantee effective and efficient work in an absolute feel-good area. Not only does the architecture comply with all modern principles, but also the work itself. Because employees are free to move around the complex as they wish, without having a fixed workstation. The premises had to be adapted to the different conditions so that meetings or brainstorming sessions can be held under the best possible conditions.

Fural metal ceilings were installed in an area of over 11,000 m<sup>2</sup>. Moreover, additional functions enable perfect acoustics as well as optimal heating and cooling options in the individual rooms. The chic white surface of the metal ceilings also gives them a very special look - they impress with their delicate elegance in the rooms of Rabobank Feelenoord.

A harmonious whole was achieved by the planning of architect Inbo Amsterdam, who worked with a great deal of sensitivity to the highest degree.

#### Project data

*Perforation:*

Rg 2,5 - 16 %

*Farbe:*

Parzifal RAL 9010

*System:*

Cooling ceiling (only tiles), substructure

*Fläche Metalldecke:*

11035 m<sup>2</sup>

*Function:*

Acoustics, heating, cooling
