

Verlagsanstalt Handwerk Düsseldorf

Joachim Hellmeister/Leichlingen, 2009

"A conference room as it should be ..." – that is the conclusion of the owner of the Verlagsanstalt Handwerk GmbH Düsseldorf. Colour, light and acoustics in the conference room are perfect. Coordination of the ceiling with various installations and fittings, plus a ceiling design in two colours, provides an ideal working environment.

The design involved clip-in tiles, while the square holes Qg 4,0 - 33 % and a slot were chosen as perforations. Along with various connections and installations, two practically invisible service flaps were installed by FURAL.

Project data

Perforation:

Qg 4,0 - 33 %, slot

Colour:
